Summary

Computer Science undergraduate with hands-on experience in Flutter development, backend integration, and machine learning through internships, academic projects, and hackathons. Skilled in developing cross-platform mobile applications using Flutter and Dart, integrating REST APIs, and working with Firebase and Flask. I enjoy building software that solves practical problems and am looking for an opportunity to contribute and grow as a Software Engineer or Flutter Developer.

Professional Skills

- **Programming Languages:** Dart, Python, Java, C, JavaScript
- **Frameworks & Technologies:** Flutter, Flask, Firebase, REST APIs
- **Databases:** Firebase Firestore, SQLite, MySQL
- **Machine Learning:** scikit-learn, pandas, XGBoost, SVM, SHAP
- **Tools & Embedded Systems:** Git, GitHub, Arduino (Uno R3, Mega), Serial Communication
- **Web Technologies:** HTML, CSS
- **Languages:** Malayalam (Native), English

Education

Rajiv Gandhi Institute of Technology, Kottayam B.Tech in Computer Science and Engineering	Expected 2027
MVGM Government Polytechnic College, Vennikulam, Pathanamthitta, Kerala Diploma in Computer Engineering CGPA: 8.57	2021 – 2024

Experience

Intern, Indian Institute of Information Technology (IIIT) Kottayam • Developed dementia prediction models using XGBoost and SVM, improving accuracy by over 10%. • Performed data preprocessing, feature engineering, and analysis on healthcare datasets. • Applied SHAP for explainable AI and identified key predictors affecting dementia risk.	May 1, 2025 – July 31, 2025
Flutter Intern, Spectrum Softtech Solution (P) LTD • Developed Flutter applications using Dart and Firebase Authentication. • Built a To-Do List application with SQLite-based local storage.	May 8, 2023 – May 31, 2023
Trainee Engineer, Networkz Systems • Gained hands-on experience with Python programming and Arduino-based embedded systems. • Developed a traffic light system prototype demonstrating hardware-software integration.	May 5, 2022 – May 25, 2022

Projects

Rail-Wallah – Railway Passenger Support System github.com/Haridev21/rail-wallah • Engineered a cross-platform mobile app (Flutter + Flask) providing unified access to PNR tracking, live train schedules, complaint management, and interactive 3D station navigation • Designed an Intelligent Route Finder using a Modified Dijkstra's Algorithm to compute optimal and fallback railway routes across the network • Used Firebase Firestore as the database with RapidAPI and ConfirmTkt integration for real-time data.
Smart Environment Control System github.com/Haridev21/smart-environment-control-system • Developed an Arduino and Flask-based monitoring system integrated with OpenWeather API. • Built a real-time dashboard displaying environmental data and automated suggestions.
Smart Door Lock System github.com/Haridev21/SmartDoorLock_Application • Designed a Bluetooth-enabled smart door lock using Arduino Mega and HC-05. • Developed a Flutter mobile application with Firebase Authentication for lock control.

Achievements

- Secured **1st Place** at the **Hack.NET 2025 Hackathon** hosted by **RIT Kottayam** for developing *Smart Alumni Connect*.
- Selected as a **Google Student Ambassador**, representing Google initiatives and engaging students through technology-focused activities.
- Conducted a 1-hour **Flutter Workshop** for students at **TinkerHub SNGCE**, covering Flutter app development and environment setup.
- Completed a 2-day **Drone Technology Workshop** at **IIST Thiruvananthapuram**, gaining hands-on experience in UAV avionics and flight control systems.
